# Igor Antun

Fullstack Developer

Sao Paulo, Sao Paulo, Brasil

## Summary

Fullstack developer and translator. Eager to learn new things.

Starting playing with tech from very early on my childhood, I started programming at age 9, and have been passionate about it ever since. From the day I was first introduced to Adobe's ActionScript, I could not see myself doing anything other than coding.

Years have passed, and my passion for learning new technologies has only grown stronger.

My current tech stack consists mainly of:

- Frontend: React, Redux, Next.js
- Backend: NodeJS, Express, Restify, Python, Websockets
- Storage: MongoDB, PostgreSQL, Redis, ElasticSearch, Neo4J
- Devops: AWS, Google Cloud (basic), Nginx, Rancher
- Desktop: Electron

And I'm actively looking forward to learning:

- GraphQL, Relay, Go, Rust, Kubernetes

## Experience

Pagar.me

Fullstack Developer

Jan. 2018 – Present

Sao Paulo

Pagar.me is a digital payment company based in Brazil. At Pagar.me, I am responsible for designing, developing, testing, deploying and maintaining scalable web services, with my team. Scalability and reliability are main

concerns. We take care of a product from its conception to its deployment, including planning its infrastructure, continuously improving it through customer feedback, and monitoring its performance.

## Vitrineed

Co-Founder and Backend Developer

Feb. 2017 – Jan. 2018

Sao Paulo

On Vitrineed, aside from being a co-founder, I'm responsible for the development and maintenance of our main NodeJS API and our advanced proprietary web scraping technology to extract and structure data from various brazilian e-commerces into our databases.

Stack: NodeJS, Restify, MongoDB, Python, Scrapy, ElasticSearch, Neo4J

## Syligo

Freelance Fullstack Developer

Sep. 2015 – Oct. 2017

Sao Paulo (Remote)

I have worked with Syligo on multiple projects, ranging from responsive web applications and hotspots to backend APIs, refactoring, restructuring and documenting them.

Stack: NodeJS, MongoDB, React, Angular, Webpack, Gulp, EJS, SASS, AWS

## BudBuds.us

Backend Developer

Nov. 2016 – Jan. 2017

Uruguay (Remote)

On BudBuds.us I was responsible for documenting and writing setup tutorials, wikis and examples for their code base and development workflow, as well as working on improving their NodeJS backend API.

Stack: Github, NodeJS, MongoDB

## Homest

Freelance Developer

Feb. 2016 – Aug. 2016

Sao Paulo (Remote)

At Homest, I was responsible for building responsive hotspots, maintaining and refactoring their main Angular web application and their NodeJS + MongoDB powered API, while also translating their contents from Portuguese to English.

Stack: NodeJS, MongoDB, Gulp, EJS, Angular, SASS, AWS
